

Yufei Chen

E-mail: chenyufei@whu.edu.cn | Website: yufei027.github.io | Github: github.com/yufei027

Education

Wuhan University, B.S. in Geographic Information Science (currently studying) Sept 2022 – June 2026

- GPA: 3.36/4.0
- **Coursework:** Principles of GIS, Physical Geography, Digital Photogrammetry, Cartography

Experience

Fundamental Geo-Information Intern, Wuhan Geomatics Institute - Wuhan July 2024 – September 2024

- Maintained and updated Wuhan city GIS datasets, including transportation networks, river systems, and governmental office locations, ensuring high accuracy for urban planning applications.
- Automated the conversion of large volumes of CAD-based city data into standardized shapefile (SHP) for 3D city map integration, enabling efficient visualization and analysis.

Projects

A lightweight mobile mapping application github.com/name/repo

- Background: Existing popular map software in China like Amap, is slow and contains many unnecessary features.
- Developed a Mapbox-based mapping application using Jetpack Compose, aiming to improve speed and remove unnecessary features .
- Tools Used: Kotlin

Skills

Languages: TOEFL:86, JLPT N2

Programming:

Python: Used in deep learning projects

PyTorch: Built and reproduced neural networks independently

C++: Basic familiarity for small scripts
